

Optional Ezi-Com Antennas Omni Directional

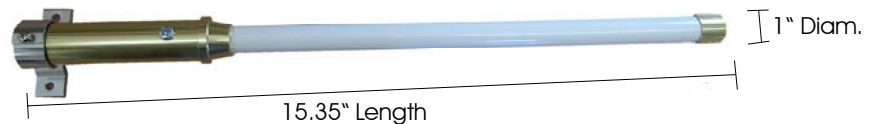

With all antennas, transmission is determined with clear line of sight. Any interfering obstacles will deteriorate or interfere with signal. The denser the object (a steel building would be considered a dense object) the more signal deterioration will be experienced.

Technical Specifications	
5DBI Antenna Part #: DMEZI-WA5	
Mounting Orientation	Vertical or Horizontal
Frequency	2.4GHz range
Beam width Deg.	Omni-directional
Gain	5dBi
External Cable length	Attached 6'
Operation Temp	-10°F~120°F (-23°C~49°C)
Weight	1.4oz (40g)
Warranty	1 Year

- Transmission distance up to 1 mile with 5dbi antenna on Ezi-Com Transmitter and Receiver.
- Omni-directional antenna designed for wireless Audio/Video transmission
- Mounts easily for indoor or outdoor use.
- Sturdy rubber exterior.
- Handy magnetic mounting base.
- Must have external Ezi-Watch audio adaptor to transmit audio.

8DBI Antenna Part #: DMEZI-WA8	
Mounting Orientation	Vertical
Frequency	2.4GHz range
Beam width Deg.	Omni-directional
Gain	8dbi
External Cable length	20' Included (Max 20')
Operation Temp	-10°F~120°F (-23°C~49°C)
Weight	1lb (370g)
Warranty	1 Year

- Transmission distance up to 4 miles with dbi antenna on Ezi-Com Transmitter and Receiver.
- Omni-directional antenna designed for wireless Audio/Video transmission
- Mounts easily for indoor or outdoor use.
- Sturdy Aluminum and PVC exterior.
- Must have external Ezi-Watch audio adaptor to transmit audio.

Optional Ezi-Com Antennas Directional

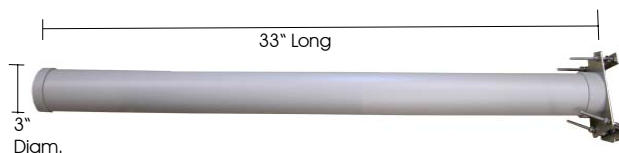

With all antennas, transmission is determined with clear line of sight. Any interfering obstacles will deteriorate or interfere with signal. The denser the object (a steel building would be considered a dense object) the more signal deterioration will be experienced.

Technical Specifications	
8DBI Panel Mount Directional Part #: DMEZI-WA8P	
Mounting Orientation	Vertical
Frequency	2.4Ghz
Beam width Deg.	
Gain	8DBI
External Cable length	20' Included (40' max)
Operation Temp	-10°F~120°F (-23°C~49°C)
Weight	3oz
Warranty	1 Year

- Transmission distance up to 4 miles with 8dbi antenna on Ezi-Com Transmitter and Receiver.
- Directional antenna designed for wireless Audio/Video transmission.
- Designed for medium/long distance wireless transmission.
- Mounts easily for outside applications.
- Ideal for building to building communications.
- Sturdy Aluminum and PVC exterior.
- Must have external Ezi-Com audio adaptor to transmit audio.

16DBI Yagi Directional Antenna Part #: DMEZI-WA15	
Mounting Orientation	Horizontal
Frequency	2.4GHz range
Beam width Deg.	Horiz. 32° Vert. 18°
Gain	16DBI
External Cable length	20' Included (Max 40')
Operation Temp	-10°F~120°F (-23°C~49°C)
Weight	2.7lb
Warranty	1 Year

- Transmission distance up to 12 miles with 16dbi antenna on Ezi-Com Transmitter and Receiver.
- Designed for long distance wireless transmission.
- Mounts easily for outside applications.
- Ideal for building to building communications.
- Matching antennas required on Transmitter and Receiver.
- Sturdy Aluminum and PVC exterior.
- Must have external Ezi-Watch audio adaptor to transmit audio.
